# *Grow Autumn-Flowering Bulbs*

## **For Perennial Beauty**

Four hardy and invaluable members of the bulb kingdom yield colorful blooms from September through the last days of fall. They are **Autumn Crocuses**, **Colchicums**, **Sternbergias** and **Hardy Cyclamens**. Plant them as you would early spring bulbs in permanent colonies or drifts in the sunny rock garden, in the informal border, or along a slope, and let them naturalize. They not only come back, but increase vigorously from year to year. Shipped and planted in August they flower during the succeeding months. They like plenty of late fall and early spring sunshine.

# Plant Bulbs for Summer Months of Bloom

## Gladioli

Colorful and dependable, gladioli are invaluable for the summer garden. They provide great substance and beauty when planted in the garden beds and borders in large groups set among perennials and annuals. Grown in separate beds by themselves they can become an all-summer reservoir of cut flowers of unrivaled beauty.

The following selected list includes the better recent introductions as well as the best of the older varieties. All bulbs are top-sized and high-crowned. Shipment is made in April and early May, and bulbs planted then are least troubled by thrips. However, bi-weekly plantings for successive blooms may be made up to July 1. All shipments are accompanied by cultural directions.

## Tigridias

Tigridias, or Mexican Shellflowers, are admired by all who grow them for their brilliant and exotic beauty. Each large, triangular flower of silky, glossy texture lasts but a day, though others come along so that sometimes four or five blooms appear successively on the same stalk from mid-July to frost. They like loamy garden soil with plenty of sun and moisture.

## Cannas

Cannas should be a part of every well balanced summer garden or border. They should be placed in the rear of the bed where their massive foliage and large flowers add imposing dignity to the planting. They like plenty of sun and good rich soil. They are lifted for winter storing in October. The following group is a selection of the best varieties. Approximate height is given.

**Ambassador.** 5 feet. Foliage suffused deep bronze. Flowers pure cherry red.

**Eureka.** 4 feet. Pure green foliage. Large creamy white blossoms.

**Hungaria.** 4 feet. Leaves bluish green. Large petaled flowers of clear pink.

**King Humbert.** 4 feet. Foliage a rich bronze. Brilliant scarlet flowers of great substance provide fine contrast.

**King Humbert Yellow.** 4 feet. Leaves are dark green. Large flowers a deep yellow lightly spotted red.

**The President.** 4 feet. Clear green foliage. Flowers a striking scarlet.

**Northern grown, 2 to 5 eye divisions,** any variety by name.

## *Montbretias*

The brilliant spikes of montbretias resemble gladioli in form and habit, but the montbretia spears are shorter and narrower and arch more gracefully. Unlike most spring-planting bulbs, montbretias need not be lifted each fall. They will winter over with a light mulch and will readily naturalize with a little protection.

Following is a selection of wonderful hybrids from Holland in shades of pale lemon through apricot to warm carmine.

	Per 10	Per 100

## *Our Book on Bulbs*

### **"Bulbs For Beauty"**

More and more gardeners are discovering that our general book on bulbs, **Bulbs For Beauty**, is worth many times its cost to anyone who grows or plans to grow bulbs. It was written expressly for the amateur gardener and answers such questions as how to grow bulbs, where to plant them, how to care for them through the years, what kinds and varieties are best. It deals with bulbs that flower in the spring, summer and autumn, and also contains a chapter on indoor growing bulbs. Besides 277 pages of text it contains copious illustrations. It sells for \$3.50 per copy and we shall be pleased to accept your orders.

## *Lilies*

Our stocks of the lovely Auratum lily, the Gold-banded Lily of Japan have recently arrived. Also for those who did not plant them last fall we have limited quantities of a few other fine lilies. Plant them in late March or early April for spectacular blooms in your garden not only for the coming summer, but other summers to follow. Approximate flowering times are indicated.

	Per 10	Per 100
<b>Auratum.</b> July-August. Gold-banded Lily of Japan. Huge wide blossom, white with gold stripe up center of petals.....	\$2.75 per 3	\$ 8.50    \$75.00
<b>Formosanum.</b> August-September. Tall, trumpet-shaped flowers of white somewhat resembling a Regal lily .....	5.00	45.00
<b>Umbellatum.</b> June. Applegate's variety. Terra-cotta, brown spotted, covered with a flush of old rose .....	6.00	55.00

# Hemerocallis (Daylilies)

The versatile daylily is excelled by no other perennial in hardiness, loveliness of flowers and length of blooming season. With little care it flowers abundantly and increases from year to year.

The newer hybrids range in color from pale, rose-tinted primrose to rich mahogany-brown, and in time of bloom from May to early September. They should be planted copiously for sure summer garden flowers and for a constant supply of bud-filled stems for opening indoors.

Per 3 Per 10

<b>August Pioneer.</b> August-September. A sturdy variety of chrome orange with outer petals flushed red.....	\$2.00	\$ 6.00
<b>Autumn Prince.</b> August to Frost. Clear light yellow. Very sturdy grower.....	<b>Each \$1.50</b>	4.00
2.50	11.00	
<b>Bagdad.</b> June-July. A deep new shade of rich brown and red. Very tall and free flowering.....	2.50	7.00
<b>Chengtu.</b> July-August. Large flower of chrome yellow with intense red throat.....	2.75	8.00
<b>Dauntless.</b> July. Pale cadmium yellow with tone of apple green at the throat.....	2.00	6.00
<b>Dumortieri.</b> May-June. A delightfully early variety of soft primrose.....	1.75	5.00
<b>Enchantress.</b> June-July. Soft yellow blended with coppery gold, pink throat.....	2.50	7.00
<b>Gloriana.</b> June. A large, free-flowering variety of clear orange.....	2.00	6.00
<b>Golden West.</b> July-August. Pure orange-yellow. A very tall variety with large blossoms.....	4.00	11.00
<b>Hyperion.</b> July-August. Deliciously scented novelty of soft canary-yellow. Very free blooming. Fine for cutting as buds open well in water.....	1.75	5.00

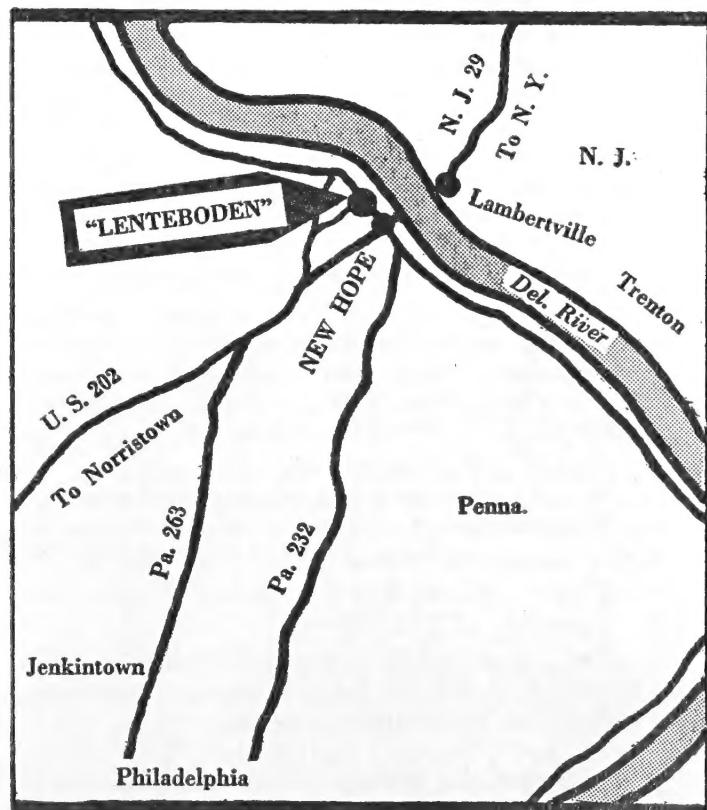

Hemerocallis will survive almost any kind of soil and location, although they flourish best in good garden soil with at least a moderate amount of sunshine. So rapidly do they multiply that the roots may be divided every three years to start new colonies. Thus a modest investment will yield huge dividends in garden beauty in a short time. Listed below is a selection of the best hybrid daylilies with blooming times indicated.

Per 3 Per 10

<b>Linda.</b> July. A tall, golden yellow variety shading to light yellow.....	<b>\$1.75</b>	\$ 5.00
<b>Margaret Perry.</b> July-August. Frequently classed as "red" or "rose" because of the rose red tones over the buff-orange background.....	1.50	4.50
<b>Mikado.</b> June-July. An outstanding novelty of rich orange with an area of deep reddish purple.....	1.50	4.50
<b>Mrs. W. H. Wyman.</b> August-September. One of the finest late varieties. Glistening silver yellow.....	1.75	5.00
<b>Ophir.</b> August. A very tall free-blooming variety of bright golden yellow.....	1.75	5.00
<b>Patricia.</b> July. A lovely pale yellow with greenish throat. Free flowering.....	2.50	7.00

## LOCATION of "LENTEBODEN"

## Tuberous Rooted Begonias

For summer gardeners with not too much time for garden care, or with problem shady areas where little will grow, tuberous begonias are ideal. Richly colored flowers, often measuring five to six inches across, are freely produced from the time the first buds mature right up to cool weather when the tubers are lifted for winter storing. The dark green foliage is attractive for its own sake, and the spectacular blossoms make beautiful table decorations when floated in a shallow bowl.

Tuberous begonias need from half to nearly full shade, such as may be furnished by high branching trees. They like good loamy soil which is not thickly matted with roots. They need plenty of air so avoid planting them under tree or shrub foliage which sweeps the ground. They need little care after planting except for watering in very dry weather.

The tubers may be planted outdoors about mid-May or they may be potted in March or early April for transplanting outside about June 1 as well-started plants. Blooms naturally come earlier from plants started indoors.

Top-sized tubers of the double camellia-flowered type are offered in the following colors: Rose, Salmon, Red, White, Yellow, Copper, Orange.

## To Our Clients:

Once more the season for spring planting is at hand. Undoubtedly your summer gardening plans call for the use this year of many bulbs, for they are unexcelled in beauty, simplicity of culture and certainty of bloom. To meet your needs we offer herewith our selected, yet comprehensive, list of the choicest and best kinds to grow among the summer- and autumn-flowering bulbs. Early ordering is highly recommended as stocks of the best bulbs are never plentiful enough.

## *Our Spring Display— A Living Catalogue*

You and your friends are cordially invited to visit our display of spring flowers here at **Lenteboden** on the River Road about a mile and a half north of New Hope. More than 30,000 bulbs in over 1,000 separate plantings by variety have been made, ranging in blooming time from the earliest snowdrops and aconites through daffodils and tulips to the late May-flowering wood hyacinths.

These flowers make a thrilling sight which certainly should be seen by every lover of garden beauty within a half day's drive from New Hope. But it is as a living catalogue that our display affords the greatest opportunity to gardeners. Not the most lavishly printed catalogue conceivable can equal or even approach this living catalogue as a means of making a selection of spring-flowering bulbs for your garden. Here you can see, not a few imperfect lithographs, but the flowers themselves, of the varieties available for your choice. So make note of the empty spaces in your garden, then come to **Lenteboden**, select and order your bulbs for the fall. We can offer for sale the vast range of varieties shown here, only during the life of the display, after which a much more restricted list is available for the convenience of later buyers.

Our gardens will be open for visiting and placing orders for fall delivery from April 1 through May 20, from 10 A.M. to 6 P.M. every day including Sundays. Weekday visiting is usually less crowded. New Hope can be reached from the New York area by N. J. Route 29. From the Philadelphia vicinity Pa. 232 and Pa. 263-U. S. 202 lead to New Hope. It is an easy two-hour drive from midtown New York and about an hour and a quarter from downtown Philadelphia. The map inside shows the location of our gardens.

Blooming times vary with the seasons but fall approximately into three periods during each of which the gardens should be visited:

1. April 1-April 20 for hyacinths, early bulbs, and species tulips.
2. April 15-May 5 for early tulips and daffodils.
3. May 1-May 20 for the tall May-flowering tulips, scillas and late daffodils.
